(54) Title: A GROUNDING ELECTRODE AND A METHOD IN WHICH IT IS UTILIZED

(57) Abstract: The present invention relates to a grounding electrode of a process in which a web (W) having a first side and a second side is arranged to serve as a substrate. A powdery layer is arranged to be formed on the first side of the web by applying electrically charged particles on the web while the grounding electrode is arranged to be located at the second side of the web. The grounding electrode is a rotating device. The invention also relates to a method utilizing such a grounding electrode.
